

# MONGOOSE

**M20  
M20S**

The M20 Series vehicle security systems are simple to use yet are fully featured.

Both models include a built-in engine immobiliser – the main deterrent against theft of your vehicle – if it cannot be started, it cannot be driven away.

An optional second engine immobiliser can be fitted.

Intrusions are detected by the opening of the bonnet, boot or doors. Further protection against possible glass breakage or body damage caused by impact is provided by the 2 stage sensor. Medium impacts chirp the siren as a warning, whilst heavier impacts fully sound the alarm.

The M20 has an electronic siren. The M20S offers the additional security of a battery back-up siren – if the wires to it are cut or disconnected, the siren itself sounds automatically.

Both models offer the convenience of 'keyless' entry of a vehicle's existing central locking with it's built-in relays.

A comprehensive list of features are detailed over the page – your Mongoose dealer will be happy to explain them to you.

FEATURES	M20/M20S
<b>SYSTEM TYPE</b>	
Alarm and engine immobiliser	✓
<b>REMOTE FUNCTIONS</b>	
2 Button Remotes	2
Rolling Code & Code Learning	✓
Central locking - if connected	✓
