

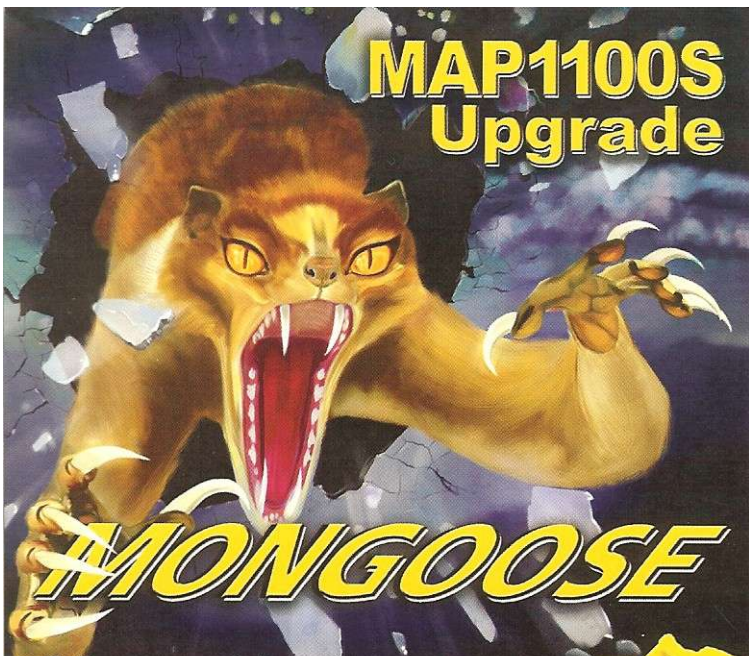

# MAP1100S Upgrade

## MONGOOSE

### Alarm Upgrade

For vehicles with factory remote central locking

*"that's a name you can trust"*

Many new vehicles today have factory remote controlled central locking and the last thing you may want is another remote on the key-ring. The MAP1100S is controlled from your cars central locking. This model upgrades the vehicle to a full security alarm & immobiliser system – in addition to anything that may already be in the vehicle.

The MAP1100S is very comprehensive and is equipped with an automatic engine immobiliser, full alarm functions, 2 stage impact sensor, black wiring, battery back-up siren, optional safety ignition door locking, automatic re-arm and automatic re-lock to name but a few.

If your vehicle already has remote controlled central locking, then install a MAP1100S – it was specifically designed for your vehicle.
