

# MONGOOSE STRIKER

## MOTORCYCLE SECURITY SYSTEM

### REMOTE CONTROLLED ALARM & ENGINE IMMOBILISER WITH REMOTE ENGINE START\*

The *Mongoose* STRIKER MCA500 is a compact, simple to use, yet well featured motorcycle alarm system. Protection against theft is by an engine immobiliser on the starter motor, a remote adjustable 8 level shock sensor and by a seat pin switch. Any heavy impact or shock to the motorcycle, such as taking it off the centre stand, will trigger the alarm.

The STRIKER is more than just an alarm and an immobiliser, it offers convenience features that make the use of your motorcycle more enjoyable.

An excellent feature is the remote engine starter\* - press of a button and your engine warms up automatically. As an accessory, fit the pager - if your alarm is activated, you get directly paged!

Fit a *Mongoose* STRIKER alarm and get real security and more pleasure out of your motorcycling.

Model: **MCA500**

Specifications and prices may change without prior notification.

\* Motorcycle must have electric start. May not operate on some models of motorcycle if equipped with factory engine immobiliser.

Whilst this security product provides a deterrent it may not prevent theft or damage through wilful criminal intent.

# Government legislation in some countries prohibit the use of the remote start feature. Legal obligations must be met and are therefore your responsibility. An installer may refuse to connect the remote start feature if prohibited by legislation.

**MP 1000 PAGER**

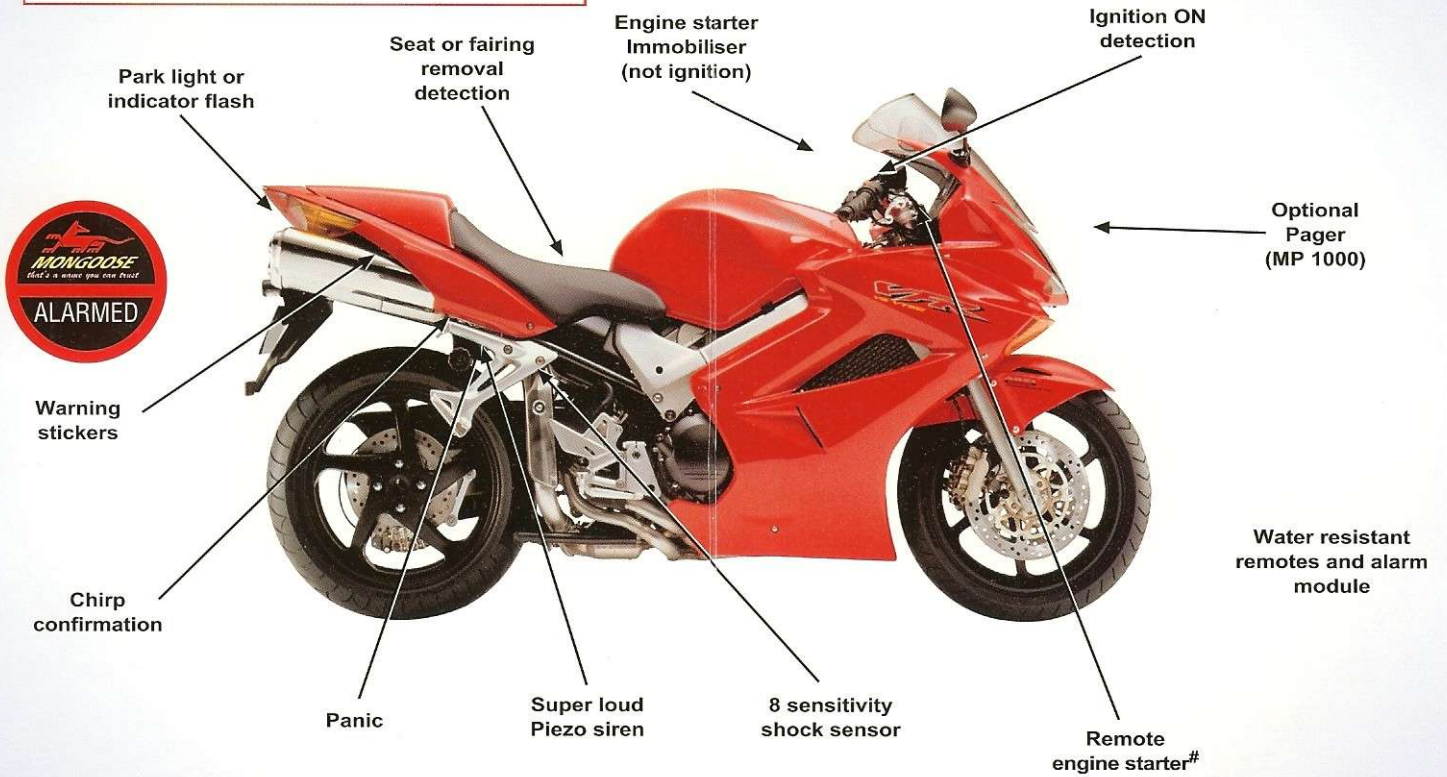

If the alarm is triggered, the pager transmits direct from your motorcycle to your belt pager, not through the phone system. Typical range is 500~1000 metres but can transmit further or be restricted depending on the terrain and surrounding buildings.
